

Product Summary

[Broad Rental Market Areas](#) (BRMAs) are boundaries that determine Local Housing Allowances (LHA) rates used by local housing officers to calculate housing benefit for tenants renting from private landlords.

BRMA Boundaries is a combined spatial dataset of BRMA boundaries for England, Scotland and Wales.

Data quality statement

The BRMA Boundaries dataset has been compiled from input data published or provided directly by the Valuation Office Agency (VOA), Rent Service Scotland and Rent Officers Wales for re-use under an open licence.

Datadaptive has taken reasonable care in preparing and cleansing the data. However the accuracy and currency of the data is dependent on the input sources. BRMA boundaries were established several years ago following a [review programme](#). Ongoing reviews from April 2011 are on a “care and maintenance” basis. To the best of Datadaptive’s knowledge the boundaries in this data collection are those currently in use for official purposes.

Data formats

Spatial data is supplied in unstyled ESRI Shapefile format with the National Grid (OSGB36) projection.

Licensing

The data may be re-used under the [Open Government Licence](#). The OGL is an [open data](#) licence, which means it is perpetual, royalty-free, non-exclusive, and allows almost unrestricted re-use of the data.
