## Appendix A: Licensing Status of the Free Company Data Product

Companies House does not claim any intellectual property rights in the Free Company Data Product and therefore does not apply the Open Government Licence to this data. CH's position was set out in an [email of 04/09/2014](#) as follows:

“Most of the material on the companies register, with the exception of a small category of material which is exempt from statutory disclosure requirements, is ‘public information’ that the Registrar of Companies is under a statutory obligation to make available to the public. Where information on the register is supplied by a company or someone acting on its behalf, any copyright in that information belongs to that company (or its agents). It does not belong to the Registrar. The Registrar supplies this third party copyright information to customers under authorities given to him under s47 and s50 of the Copyright, Designs and Patents Act 1988 and Schedule 1 of the Database Regulations (SI 1997/3032).

“CH places no restriction on how the information is used, but advises all customers to take their own legal advice regarding possible breach of third party copyright.”

The GB Startup Index data product includes Added Value Data that has been calculated from data in the Free Company Data Product, but does not contain any of the Free Company Data Product data itself.
